

An Introductory Course in Sexual Medicine

Dear colleagues,

This is the first attempt at an online course for sexual medicine by the African Society for Sexual Medicine (ASSM). The course, while not inclusive of all topics that we see in sexual medicine, will nevertheless allow you to obtain a certificate titled "An Introductory Course in Sexual Medicine."

While you progress with the course you will obtain adequate knowledge to assess, assist and satisfy your patients' needs when they are faced with sexual difficulties.

The curriculum comprises 24 topic modules with 132 learning units covering ESMN foundations, sexual health promotion, clinical assessment, treatment protocols, and research methods — with bilingual English and French content.

The course is offered FREE to all registered members of the ASSM and will be continually updated as more courses and information become available.

Dr. Prithy Ramlachan

Founder, African Society for Sexual Medicine
